PROFILE

Proficient **MERN Full Stack Developer** with expertise in **MongoDB, Express.js, React.js**, and **Node.js**. Skilled in building scalable web applications with RESTful **APIs** and database integration. Experienced in front-end and back-end development, deployment, and performance optimization. Strong knowledge of Git, **responsive design**, and agile methodologies, with the ability to deliver efficient, user-friendly solutions across platforms.

WORK EXPERIENCE

2024 – Present (Freelancer)

Kakinada

Web Developer & MERN Full Stack

- In 2024, I worked on four freelance projects where I contributed to both frontend and backend development. For **MoreIn**, I created a responsive and engaging web interface that focused on user-friendly design. At **Sai Priya Hotels**, I developed a booking and management system using React.js with backend integration to ensure smooth functionality. For **HT_Brand**, I designed a modern and visually appealing website with performance optimization for better reach. Lastly, with **Andhra Restaurant**, I built a full-stack solution that included API integration, backend services, and a React.js-powered frontend to deliver a seamless digital experience.
- MoreIn** – Developed a responsive web application with dynamic UI.
Sai Priya Hotels – Built booking and management features with React.js and backend integration.
HT_Brand – Created a brand website with modern UI/UX and optimized performance.
Andhra Restaurant – Designed a full-stack solution with API integration, backend services, and React.js frontend.
